UNCODED

After the ship was meered to the quay, an INFIGAT official, two customs efficers, and an official to handle the leading boarded. The seaman identification eards were checked against a list of personnel; they did not consider it necessary to see the personnel. Without searching the ship, they said the inspection was completed. They departed, taking with them the identification cards.

Passes permitting the ship's personnel to go ashere were brought to the ship the evening of the same day; there were no time restrictions on the liberty. An armed sentry was stationed on the quay.

2. Port Facilities, Installations and Activities: Outside the Petroleum Hole there was a steel not of sufficient length to close the harbor. One end was fastened to a busy and the other to the mole. Informant's sketch shows the location of this net.

The maritime agency, INFLOAT, had its quarters in the upper floor of a two-storied building located across the harbor from the Petroleum Hole. The INFLOAT agent was a tall, husky man about 50 years old.

A policeman and a customs officer were on guard at a gate to the south of site #11. About 30 to 40 meters south of this gate there was a building in which a great many police agents were observed.

Twelve motor fishing boats were moored from the stern to the quay at site fil in front of the park. These boats were active every day; they sailed out of the port at 0600 hours and returned when it was beginning to grow dark. When both leaving from and returning to the port, these beats were delayed at the end of the Petroleum Mole for an examination. The catch of fish was unleaded at their moorings, at which there was a small fish market.

AIP Activity:

	At about 1400 hours on 25 January, three jet planes flying
	from southeast to the northwest at a high speed and altitude. The wings of these planes were gray in color and set well aft on the fuselage.
1.	Mayal Vessels and Activities: was about 5 to 7 miles off the coast on a course of 070° empoute to Batumi.
	a Soviet patrol boat anchored 2 or 3 miles off the coast
	at Makriales and another at a sintler distance off Tabbahar. When

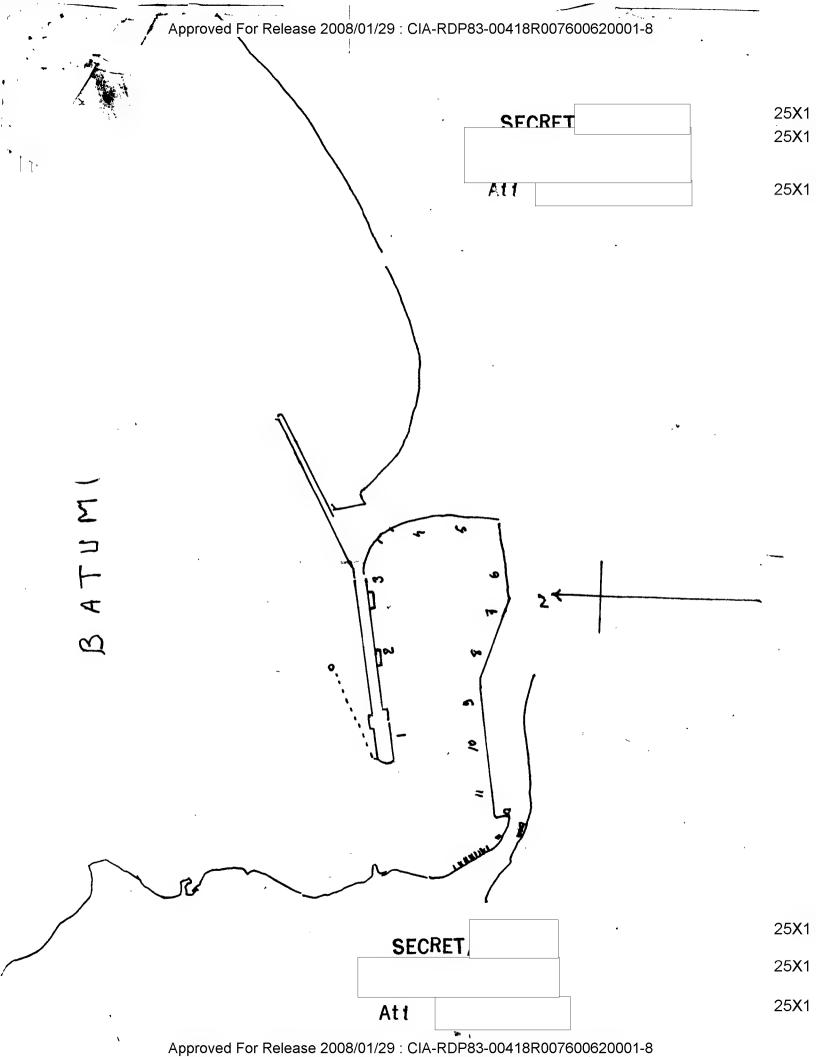

at Makriales and another at a similar distance off Eakhaber. When ship had closed to a distance of about one mile from the first boat, both sailed toward Batumi at a speed of 18 to 20 miles per hour. Three hours later, when approaching Batumi, these boats were seen leaving the harbor. They took up a course of approximately OhO at a speed of about 20 miles per hour.

When departing Batumi two patrol boats were again seen off Makriales and Kakhaber.

The patrol beats were described as being dark gray in color and 18 to 20 meters in length with a flush deck. There was a small mast but no stack or radar. Forward, there was a small caliber sun without a shield.
